ABOUT THIS BOOK

eBook Publishing At A Glance is a small eBook that was written to give its reader “*At A Glance*” of what eBook Publishing is all about.

The phrase “*At A Glance*” is to tell its reader that, the book does not intended to go too deep into the detail of what it takes to publish an eBook, but is to tell of its key components. Like a skeleton of what it takes to publish an eBook.

On so many websites and blogs that I have visited, I can see how people are desperately looking for the know-how of how to publish an eBook. To me, is like books are bottled up in so many people minds and looking for a way to come out. Unfortunately traditional publishing system does not allow them to come out. But now with the advent of digital publishing, a lot of INDIE Self-Published Authors have been born.

And thank GOD for some Digital Publishing companies like Amazon.com, Smashwords.com, Kobo.com, Barnesandnobles.com, Draft2Digital.com, iTunes.Apple.com and many more, that now makes Publishing an eBook as easy as writting the book itself.

You can now write and self-publish a book as an eBook by yourself and sell it to both local and international market without passing through a book publisher, and earn a substantial royalty for your work.

So what does eBook Publishing mean or involve?

Let look at it at a glance.

What is eBook Publishing?

It is a method of publishing a book into a digital form; to make it available to be read on eBook Reading Devices – like SmartPhones, Tablets, Laptops or branded eBook Reading Devices like Amazon.com *Kindle Fire*, Kobo or Barnesandnoble *Nook eBook* reading device.

What this simply mean is that, as an individual, you can now write a book: [any type of book: academic, motivational, research work, comic, cartoon, play, religious, magazine] and publish it yourself on the internet without necessarily having to pass through a publishing house, then sell it [or them] on Amazon.com, Smashwords.com, Kobo.com, AppleStore, Barnesandnoble.com [These are the world 5 largest eBook Retail shops] or sell it on your own website and earn good bucks for your work.

It has never been as easy as it is now, to publish a book.

Nature of an eBook

An eBook is an electronic format of a book. It is digital in nature. It can be read on your PC, Laptop, Tablet, Smartphone or eBook reading devices like Kindle Fire, Nooks and Sony Reader, with an eBook reading software or Apps install on it.

As technology and Computer devices grow, there was a shifting from old conventional printed book to an electronic book format.

eBook support rich multimedia content: you can embedded audio or video clip into an eBook.

It also supports the use of Hyperlinks: you can link to a website or a webpage, Facebook, Twitter, Instagram via your book so that when your reader clicks on it, the webpage will open to them.

eBook Reading Devices

These are devices where eBooks can be read: SmartPhones, Tablets, Laptops or branded eBook Reading Devices like Kindle of Amazon.com.

Because of the nature of an eBook, it doesn't occupy space. A single SmartPhones with 8GB memory card can hold up to 500 or more eBooks, with only the weight of the phones being felt.

Your Laptop can turn into an eBook Library that the biggest bookshop in the city cannot rival it.

Self-Publishing: What does it mean?

It means, you write your book by yourself, and without a middleman publisher, you publish it as an eBook by yourself.

There are more than 2,000,000 self-published authors on **Amazon.com** and more than 400,000 on **Smashwords.com**: these are people who wrote their books by themselves, publish it by themselves without a publisher in the middle; and collects a substantial Royalty for their works.

Types of Books to eBook

Types of book works that can be made an eBook:

You can make any type of book an eBook. [Motivation, Management, Academic, Brochure, Magazine, Learning, or any topic.]

You can make any type of writing an eBook.

Maybe you are a Teacher, Lecturer, Speaker, Cartoonist, Comic Writer, Play writer, Pastor, Motivational speaker, ICT Professional or Professional in any field of life - Medicine, Nursing, Catering, Farming, Military, Architecture, Music, Mass Communication - you can write a book in your field of specialization and publish it as an eBook and sell it to your locality or to the whole world and earn a good royalty for your work.

Cost of Publishing an eBook

It cost little to publish an eBook. It cost 10 times less to publish an eBook than to publish a physically printed book.

Because of the digital nature of an eBook, it is easy to store, distribute and sell.

To publish and print 1,000 copies of a 100 pages physically printed book, will cost you roughly \$2,000.

To print extra 1,000 copies of this same book, may cost you something like \$1,200 + transportation and storage charges.

But in eBook publishing, you only pay for the production of only 1 [one] copy. May be, it will cost between \$300-\$500 [depends on the type of eBook to produce], to produce the first master copy.

Then it can be made ready for download for 10,000 buyers within a day.

No need for warehouse to store the 10,000 copies, like as it is in the case of physically printed copy.

You don't need to reprint or remake extra copy when more demand is made. A single master copy can be sold to 1,000,000 buyers in a week on request. Simply pay and download it.

So it is far, far cheaper publishing an eBook than publishing a printed book. And the whole world is your buyer.

Selling your eBook

You can sell your eBook on **Amazon.com** [**Amazon.com** is the World largest eBook store].

You can sell your eBook on **Smashwords.com**, **Barnesandnoble.com** or **kobo.com**. [These are international eBookStores.]

You can also sell your eBook on local web stores or your own website.
